Off the sheet, on the street

Creative pitch for Albert Česká republika · Christmas 2026

You've done this before.

Albert, spring 2013 · 17 April – 28 May

- One card for every 200 Kč
- 24 cards with a 3D effect, plus an album
- QR codes linking to an Angry Birds page
- An in-store trading day and a photo wall

It worked. So would we invest in the same thing again?

Yes – as a sequel, not a repeat.

01 · WHY ANGRY BIRDS

Thirteen years later.

	2013	2026
The season	Spring, one card per 200 Kč	Christmas, the biggest basket of the year
The film	—	The Angry Birds Movie 3, in cinemas 23 December
The cast	—	MrBeast and Salish Matter, the centre of a kid's YouTube feed
The players	Teens on their first smartphones	The same people, now parents of 6–10-year-olds
The "3D"	A lenticular trick on flat paper	The bird stands on your kitchen table in AR
The code	QR to a web page	Single-use code that opens a game

02 · WHO IT'S FOR

Kids collect. Parents remember.

Kids 6–10 · the core

Prime age for collecting and for asking. They know Angry Birds from the games, YouTube and the new film, and they trade in the schoolyard.

Parents 30–45 · the buyers

They spend the 300 Kč and choose the shop. They played Angry Birds themselves, so the yes comes easy.

A card in a drawer is forgotten. A bird on the kitchen table gets shown to everyone.

The pigs stole Christmas.

Collect the birds and bring it back.

03 · THE CONCEPT

How it works.

1

Shop

Every **300 Kč** at Albert gets one Angry Birds card in a blind pack.

2

Collect

30 cards: the main birds, Christmas versions, pig villains and 3 rare golden cards.

3

Scan

A **single-use** code adds the bird to the Christmas rescue in the Albert app.

4

Play

The bird stands on the card in AR. **Slingshot** it at the pigs across the table.

5

Save Christmas

20 birds save **Christmas**. All 30 rebuild Bird Island for the **holidays**.

03 · THE CONCEPT

No duplicate is wasted.

Feathers

Scan a duplicate and it turns into feathers. Five feathers buy any missing bird in the app.

The schoolyard

Kids swap the physical cards at school. The hype spreads by itself.

Swap Days

December weekends in Albert hypermarkets. The 2013 trading day, grown up.

TIMING Early November → **23 Dec** film in cinemas, the final push → **31 Dec** close · measured **1 Jan 2027**

04 · KEY VISUAL

The bird breaks out of the card.

HEADLINE

The pigs stole Christmas.

SUBLINE

Collect 20 birds and bring it back.

MECHANIC

One card for every **300 Kč**. Only at **Albert**.

THE SET

30 birds. Collect 20 to save Christmas. Collect all 30 to bring Bird Island home.

05 · IN COMMUNICATION

One idea, every format.

TV · 20 seconds

Evening kitchen. A kid scans a card, Red bursts onto the counter, pigs drag the presents away. Slingshot. End card with the film date.

Print · Flyer

A flyer page where Red tears through the paper itself. A gallery of all 30 birds with tick-boxes for collecting.

Social

Parents: "You played it on your first smartphone. Now they're saving Christmas." Pre-roll around kids' YouTube. Kids' AR videos do the rest.

In store

A card stand at kids' eye level by the checkout, posters of all 30 birds, Swap Day corners and a photo wall.

06 · THE NUMBERS

How it reaches one million.

Goal	Cards, on average	Spend
20 of 30 · Christmas saved	~32	~9,600 Kč
All 30 · Bird Island	~120	~36,000 Kč

Random blind packs, one card per 300 Kč, before trading or feathers. Those close the gap to 30.

Saving Christmas fits inside a family's normal Christmas shopping. Completing the set is the reason to keep coming back.

THE LEVERS

- Kids ask, parents recognise
- 20 is reachable, 30 keeps them shopping
- Doubles become feathers and trades
- The app at home, the schoolyard outside
- Christmas basket plus the film on 23 December
- A format Albert already proved

You've done this before, and it worked.

This time, the birds come off the card.

The pigs stole Christmas. One card for every 300 Kč. Only at Albert.
